Front-end Developer with experience designing and developing websites and apps using the latest in web technologies, including JavaScript and ES6, React and Vue.js.

SKILLS

PROJECTS

GLYDR

- Crafted a hyper-casual mobile game Unity 3D with C# in collaboration with others using GitHub.

HARVUST.COM

- Aided in designing a search engine crafted by a cousin in PHP by creating mockups in Photoshop.

JPERRYDEV.COM

- Leveraged modern technologies like Vue.js, Contentful, and Bootstrap to program and Adobe XD and sketch to design a more eye-catching portfolio website.

UDACITY FINAL PROJECT

- Constructed a website using React that used Google Maps to display locations of popular companies in the Seattle area fetching images from foursquare for each location.

EXPERIENCE

Data Labeler for Aquent at Microsoft Bellevue Campus June 2016 – March 2017

- Optimized workflow by 40% to overcome challenge in reaching daily throughput of 1,000 queries a day.
- Crafted a system to reduce repeated stress on wrist to help elevate productivity.

Material Handler for Apex Systems at Boeing Everett Factory June 2015 – August 2015

- Helped ease tensions between two co-workers with diplomatic solutions to their dispute.
- Streamlined workload by 20% to reduce wasted time.

EDUCATION

Udacity – Front-end Nanodegree Graduated: April 2018

BYU-I Pathways

Everett High School – Diploma Graduated: June 2013

ACHIEVEMENTS

- Marketed and sold a Minecraft based music album that sold worldwide grossing \$3,000 in revenue in the first year sold.
